Priorities and Activities

Establishment of efficient structures and introduction of modern procedures in central executive bodies, including

- continuation of the restructuring process in ministries
- introduction of modern practices and state policymaking instruments
- revision of the Rules of Procedure of the Cabinet of Ministers of Ukraine

Introduction of modern methods of human resources management in civil service, including

- optimization of the procedure for recruitment of civil servants
- introduction of the information system for human resources management and civil servant's e-cabinet
- introduction of the procedure for performance evaluation of civil servants with clear Key Performance Indicators (KPIs)

Implementation of e-governance instruments, including

- introduction of a system for electronic interaction among state agencies, and further implementation of electronic document management systems
- optimization of provision of 50 popular public e-services using mobile ID
- further active development of open data: over 41 000 data sets, and approximately 2 900 managers on the centralized portal data.gov.ua

Key Challenges

Complicated service delivery processes

Difficult mechanism of developing collaborative solutions for services optimization

Legislative process regulating services is slowing change

No/little data exchange in electronic form

KPIs and reform process monitoring

Ministerial services networks; e-services keep developing

UA PAR Strategy 2016-2020: Key Achievements

Reform launched in
13 pilot ministries and
agencies

50 new directorates
established

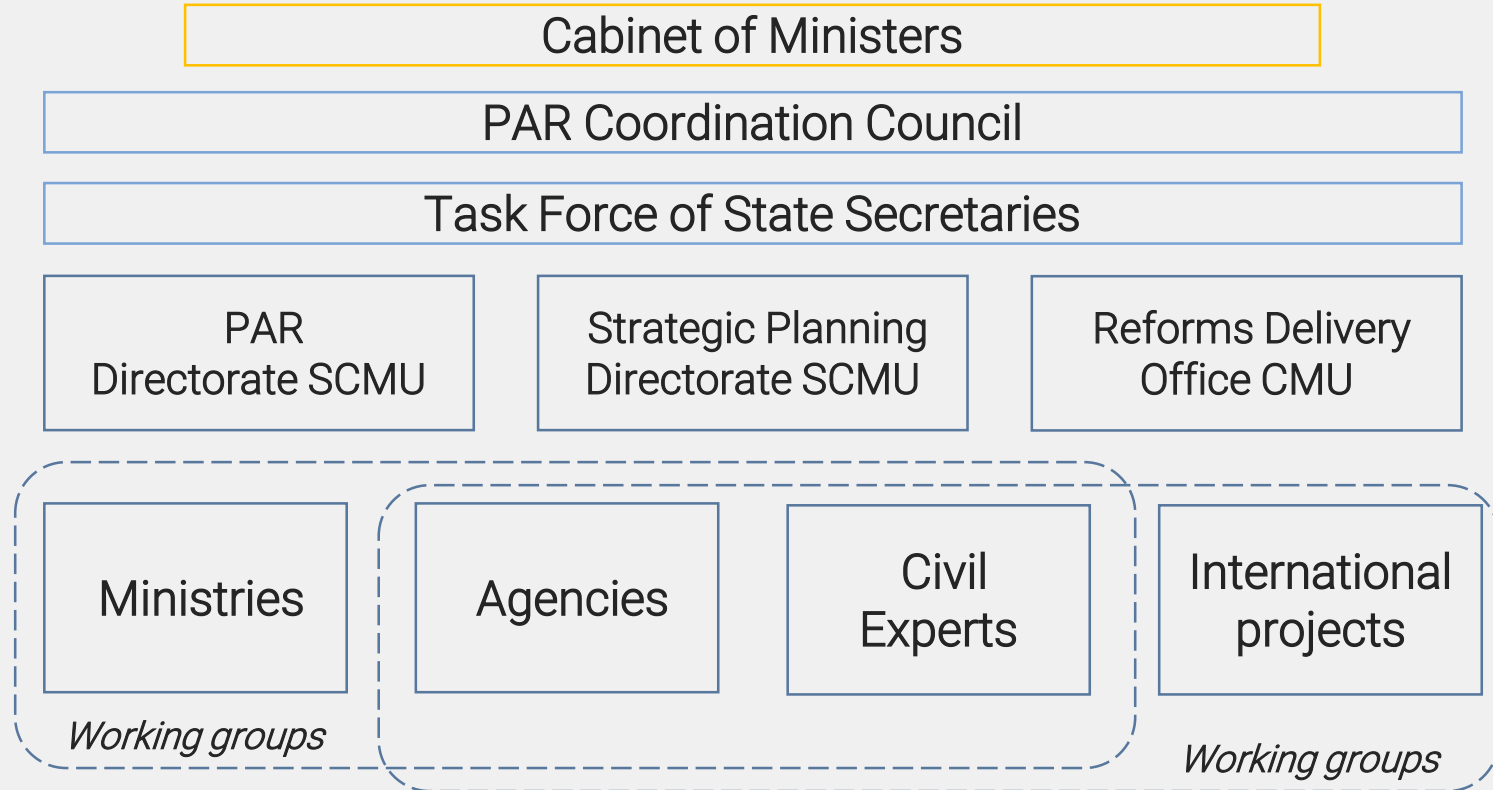

Strategic planning
directorates in 10
ministries and SCMU

Modern recruitment
portal career.gov.ua

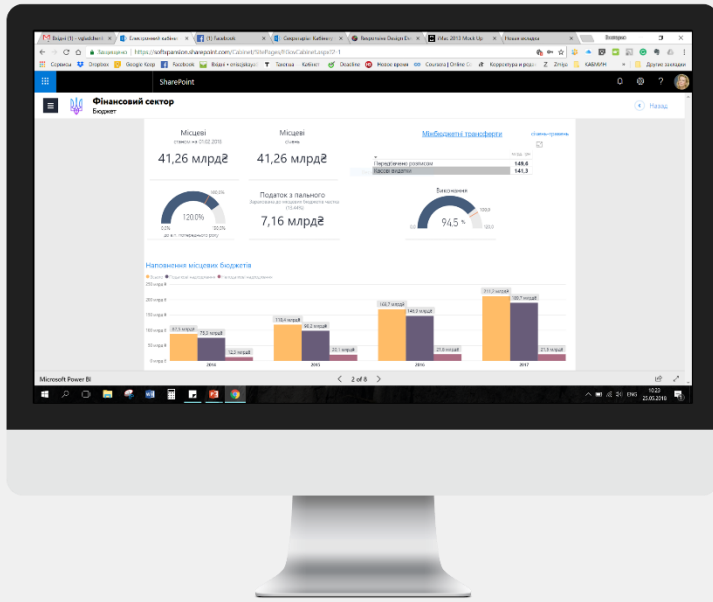

Around 1300 reform
staff positions
planned for 2018

+8 ministries planned
for 2018

PAR Coordination System

Government intranet web-portal

Corporate communication

Cabinet of public servant

Collaborative work on documents

Project management

Analytics and reporting: monitoring systems

Possibility of connection with other subsystems

Interoperability of the Registries

Mapping of the state
electronic information
resources

Interoperability
Road Map 2020

Policy agenda:

- the Law
“On Public
Electronic
Registries”
was drafted
- implementation
of the principle
“Digital by
Default”

The system of electronic
interaction of state electronic
resources

Harmonization of EU Core
Vocabularies
Development of the National
registry of electronic
informational resources

e-Services

20 priority electronic services for citizens and business were launched during 2017

More than 50 e-Services available at that moment

The Government portal with e-services list was launched: kmu.gov.ua

100 key administrative services to be provided till 2019

Policy agenda:

- Concept for e-Services Development in Ukraine was adopted

e-Document Implementation

All Central Executive Authorities
& Regional State
Administrations are connected
to the EISPA

During last year SKMU
processed about 2 600 drafts of
regulation acts in paper form

Policy agenda:

- further development of the EISPA
- implementation of local document flow systems in public authorities

About 5 000 e-documents are
daily processed by the
Electronic Interoperability
System of Public Authorities

In 2018 we'll launch a EISPA's
subsystem for the development
of regulation acts in electronic
form only

EISPA

Open Data

Accession of Ukraine to the
International Open Data Charter

data.gov.ua

40 000+ datasets from 2900+ data
holders were published on state
open data portal

Open Data Challenge

national competition of open data
based IT projects was held

Policy agenda:

- promoting open government data by public authorities and improving their quality for qualitative analysis
- implementation of the next version of the Single State Web-Portal of Open Data

Thank you for attention!
