Ongoing Reforms

Public administration

- Anti-corruption
- Pension
- Tax
- Health care system
- Education and science
- Management of state enterprises
- Development of farming and co-operation...

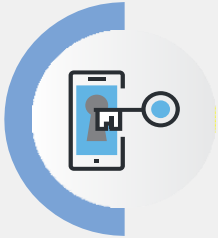
Priorities and Activities

Establishment of efficient structures and introduction of modern procedures in central executive bodies, including

- continuation of the restructuring process in ministries
- introduction of modern practices and state policymaking instruments
- revision of the Rules of Procedure of the Cabinet of Ministers of Ukraine

Introduction of modern methods of human resources management in civil service, including

- optimization of the procedure for recruitment of civil servants
- introduction of the information system for human resources management and civil servant's e-cabinet
- introduction of the procedure for performance evaluation of civil servants with clear Key Performance Indicators (KPIs)



Implementation of e-governance instruments, including

- introduction of a system for electronic interaction among state agencies, and further implementation of electronic document management systems
- optimization of provision of 50 popular public e-services using mobile ID
- further active development of open data: over 41 000 data sets, and approximately 2 900 managers on the centralized portal data.gov.ua

Key Challenges

Complicated service delivery processes

Difficult mechanism of developing collaborative solutions for services optimization

Legislative process regulating services is slowing change

No/little data exchange in electronic form

KPIs and reform process monitoring

Ministerial services networks; e-services keep developing

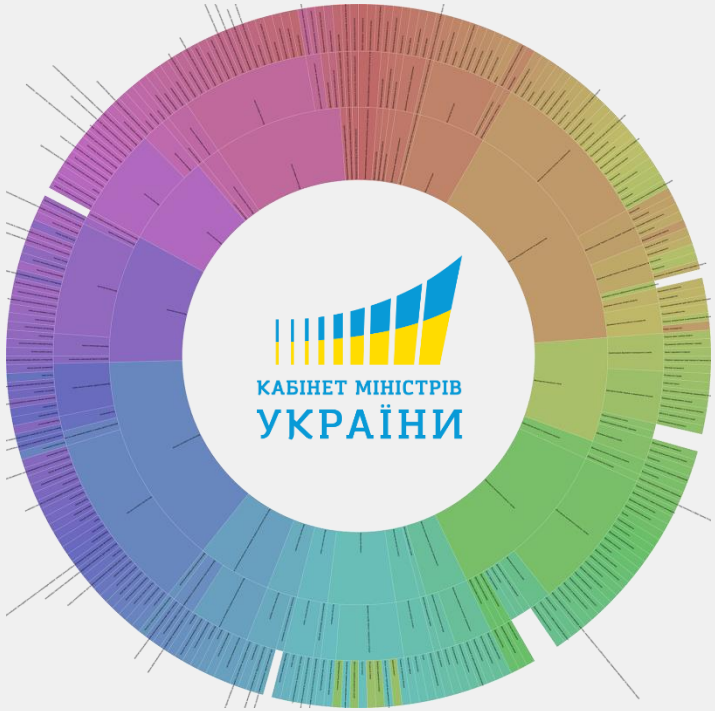
EU Financial Support for Public Administration Reform

2017	2018	2019	2020	2021
€10 mln	€20 mln	€20 mln	€20 mln	€20 mln

+ 14 mln technical support

5 years
€104 mln

UA PAR Strategy 2016-2020: Key Achievements



Reform launched in 13 pilot ministries and agencies

50 new directorates established

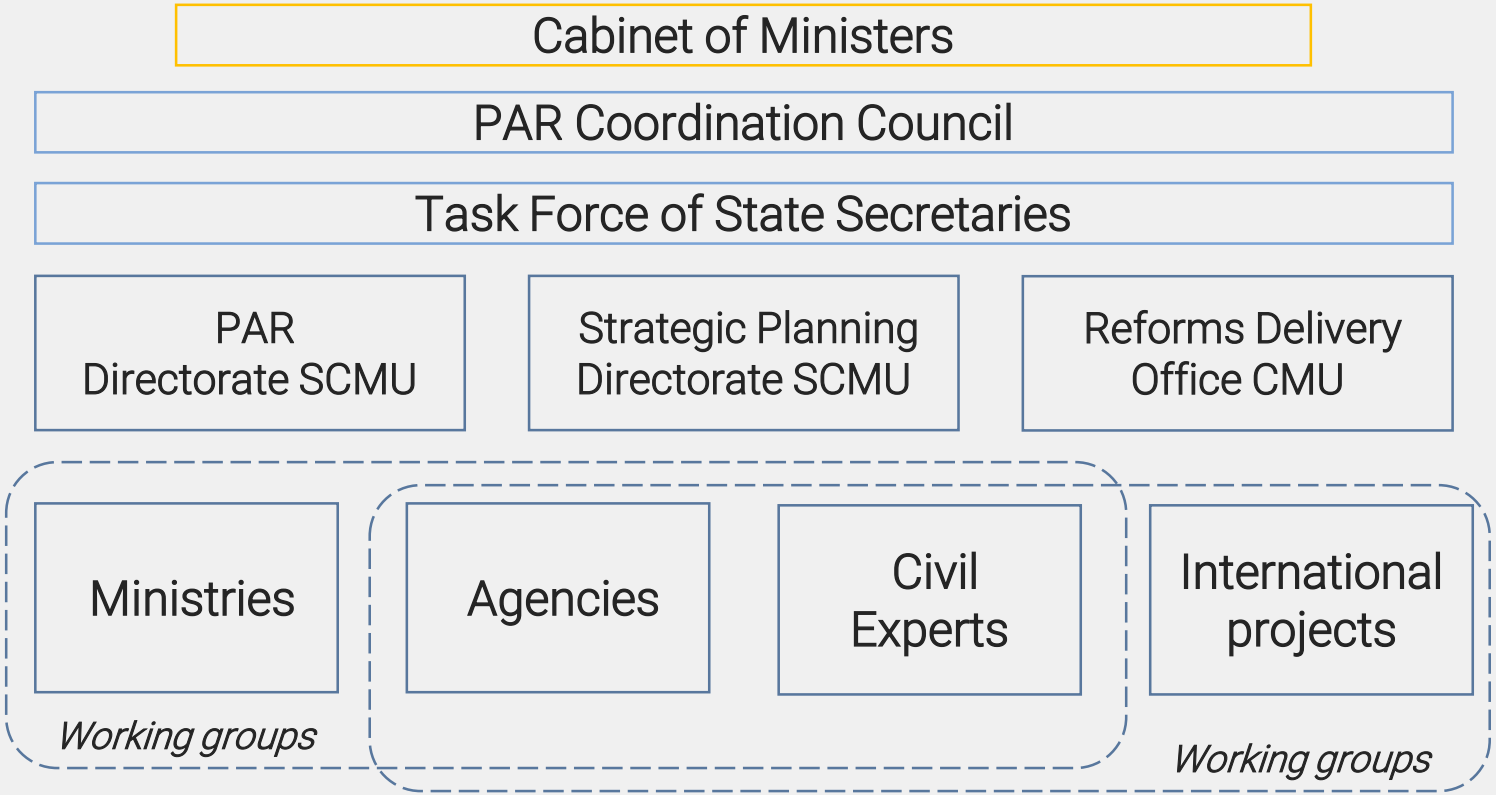
Strategic planning directorates in 10 ministries and SCMU

Modern recruitment portal career.gov.ua

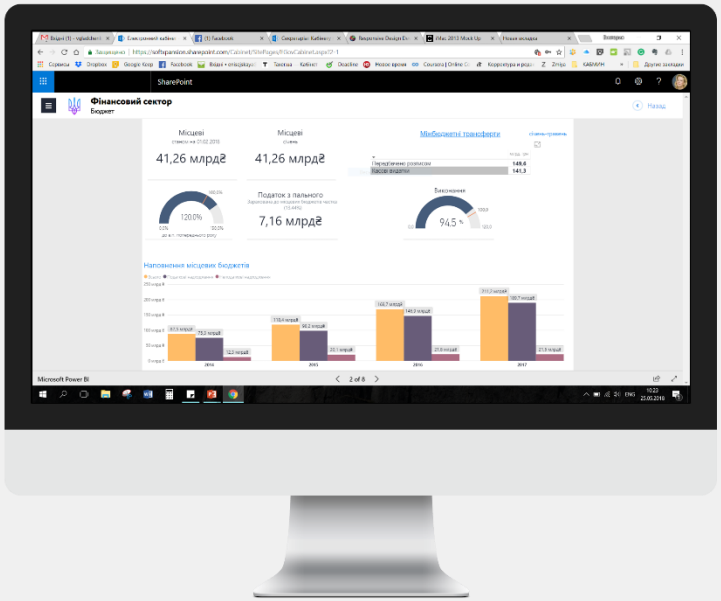
Around 1300 reform staff positions planned for 2018

+8 ministries planned for 2018

PAR Coordination System



Government intranet web-portal



Corporate communication

Cabinet of public servant

Collaborative work on documents

Project management

Analytics and reporting: monitoring systems

Possibility of connection with other subsystems

Interoperability of the Registries

Mapping of the state electronic information resources

Interoperability Road Map 2020

The system of electronic interaction of state electronic resources

Harmonization of EU Core Vocabularies
Development of the National registry of electronic informational resources

trembita

Policy agenda:

- the Law “On Public Electronic Registries” was drafted
- implementation of the principle “Digital by Default”

e-Services

20 priority electronic services for citizens and business were launched during 2017

More than 50 e-Services available at that moment

The Government portal with e-services list was launched: kmu.gov.ua

100 key administrative services to be provided till 2019

Policy agenda:

- Concept for e-Services Development in Ukraine was adopted

e-Document Implementation

EISPA

All Central Executive Authorities & Regional State Administrations are connected to the EISPA

During last year SKMU processed about 2 600 drafts of regulation acts in paper form

About 5 000 e-documents are daily processed by the Electronic Interoperability System of Public Authorities

In 2018 we'll launch a EISPA's subsystem for the development of regulation acts in electronic form only

Policy agenda:

- further development of the EISPA
- implementation of local document flow systems in public authorities

Open Data

Accession of Ukraine to the International Open Data Charter

data.gov.ua

40 000+ datasets from 2900+ data holders were published on state open data portal

Open Data Challenge

national competition of open data based IT projects was held

Policy agenda:

- promoting open government data by public authorities and improving their quality for qualitative analysis
- implementation of the next version of the Single State Web-Portal of Open Data

Thank you for attention!
